

ABC USERS SUMMIT

HEALTH CARE • INDUSTRIAL

Four Seasons Resort and Club Dallas at Las Colinas | May 15–17, 2019

RESOURCE GUIDE
2019

Health Care

Industrial

Welcome to the seventh annual ABC Users Summit!

Thank you for joining us here in Dallas. The stage is set for two days of candid conversations about the topics that matter most to our unique group of owners and contractors, including attracting and retaining a safe workforce, becoming a client of choice and leveraging analytics.

I urge you to join the dialogue—the more perspectives shared, the better we can understand each other’s pain points and measures of success. Collaboration and communication are crucial in the AEC industry, and this summit provides a great venue to put those tenets into practice in an environment of high trust.

Challenge yourself to share and implement best practices learned when returning to your office or jobsite. That’s where the construction delivery and execution process can truly be impacted.

I’d like to recognize the members of the Industrial and Health Care Steering Committees for their leadership, our event sponsors for their financial support, and the presenters and moderators for sharing their time and talent.

Reach out to me or any ABC National staff member if you need assistance and/or to offer feedback during the event.

I’m looking forward to another great summit.

Sincerely,

Kevin Sell
Chief Values Officer
United Group Services
ABC Users Summit Chair

EMERGENCY INFO

Evacuation Procedures:

In case of an emergency, attendees will be guided by hotel staff to the nearest emergency exit of the meeting space and continue to the top level of the parking garage.

From Las Colinas, the nearest exit is through the double-glass doors, located adjacent to Las Colinas West beside the Amphitheater. Once outside, turn left and follow the sidewalk to the parking garage.

From Cottonwood, exit the room into the Foyer. Once in the Foyer, turn right and proceed down the steps and out the double-glass doors across from the Four Seasons Ballroom. Turn left and follow the sidewalk to parking garage.

Medical or Emergency Procedures:

The property’s security staff is trained in CPR, first aid and disaster preparedness. If an automatic external defibrillator is needed, devices are located in security and the sports club. In case of an emergency, dial ext. 55 on a hotel phone. For non-emergency situations, dial ext. 2406 on a hotel phone.

Thursday, May 16, 2019

12-12:30 p.m.

Lunch *Las Colinas*

12:30-1:45 p.m.

Opening General Session

Today's Workforce: What You Should Know. What You Should Expect.

Las Colinas

Users and contractors know all too well that the craft professional population continues to decrease despite the efforts of industry groups to reverse this trend. Join our interactive panel of top industry experts as we investigate the depth of the problem, identify solutions that are working for contractors and users, and discover the steps to begin charting your organization's path forward to attract train and retain a safe and productive workforce.

Moderator: Kevin Sell, United Group Services

Speakers: Dan Belcher, NCCER; Dan Freese, Elite Welding Company/United Group Services; Daniel Groves, Construction Users Roundtable/CLMA; Ed Luckenbach, Air Products and Chemicals; Greg Sizemore, ABC

1:45-2 p.m.

Break

2-3:15 p.m.

Industrial Breakout

Variability: The Tacit Enemy of Predictable and Reliable Project Delivery *Cottonwood*

Every construction project is subjected to variability and the disruption it creates; so much so, it often goes unnoticed and is simply considered part of the construction process. Learn the laws of variability and its impact early in the life of a project. Explore the injection of variability by owners, engineers, contractors and government entities and how to significantly reduce variability and its disruption.

Moderator: Michael Casten, Construction Concepts

Speakers: David Chapin, Willmar Electric; Ed Luckenbach, Air Products and Chemicals; Dr. Kenn Sullivan, Arizona State University

Health Care Breakout

The Impact of the Built Environment on Health Care Strategy *Las Colinas*

America's health care system faces a myriad of challenges, including improved access for more people, lower cost of delivery and better outcomes for patients. Health care executives must rethink how future construction practices can help address those challenges, and the designers and contractors of choice must critically review and analyze all aspects of health care construction delivery to determine whether new approaches can be implemented if they wish to perform tomorrow's projects.

Moderator: Joe Powell, Healthcare Infrastructure Research

Speakers: Brian Holmes, Texas Health Resources; Gregory Mohler, BJC Healthcare; Scott Nelson, Advocate Aurora Health; Capt. Nate Price, Defense Health Agency

3:15-3:30 p.m.

Break

“ MetroPower is a great asset to any project team. They bring experience, dedication and we have a goal-oriented relationship which goes a long way in the markets we currently serve. ”

Sessions

Thursday, May 16, 2019

3:30-4:45 p.m.

General Session

Contracting Strategies for Large Capital Projects *Las Colinas*

Is it true that any old contract will do? Do you invest enough time and attention to contract development and negotiation in order to share risks intentionally in a way that makes the most sense for your project? Participate in a discussion of different strategies for the effective use of various project delivery methods and contract forms, clauses and language intended to maximize positive project outcomes and minimize disputes.

Moderator: David Pugh, Bradley

Speakers: Jim Dimas, LG&E and KU Energy LLC; Michael Hatton, Memorial Hermann; Laura Stipanowich, Bechtel Oil, Gas & Chemicals; Lowell T. Woods Jr., Taft Stettinius & Hollister LLP

6:15-7 p.m.

General Reception *Pavilion*

7:15-9 p.m.

Dinner *Pavilion*

9-10:30 p.m.

After Party *Pavilion*

Friday, May 17, 2019

7-8:15 a.m.

Breakfast Program

United Rentals' Total Control and Cost Benchmarking Study: Saving Users and Contractors Money *Las Colinas*

Technology is becoming entrenched in many parts of the construction lifecycle, and equipment is valued as much for the information it can provide—about its location, use and performance—as it is for the tasks it performs. United Rentals will provide an overview on how customers are leveraging analytics to make better fleet decisions and how Total Control improves efficiencies on site and in the office.

Speaker: Ty Campbell, United Rentals

8:30-9:45 a.m.

General Session

Better People. Better Projects. Client of Choice. *Las Colinas*

The largest predictor of project success is the capability of the people doing the work. The problem is there are only so many experts in the industry, and owners are in competition to attract them to their projects. This session will present 20 years of research on how owners can attract better designers and contractors and work with high-performing teams to become a client of choice.

Speaker: Dr. Kenneth Sullivan, Arizona State University

9:45-10 a.m.

Break

10-11:15 a.m.

Industrial Breakout

How Owners' Construction Management Teams and Contractors Can Collaborate on Quality Facilities *Cottonwood*

Owners' construction management teams and selected contractors want to deliver exceptional facilities to the ultimate operators or users—projects that are safe and deliver cost/profit certainty and quality. We will discuss driving down operating and maintenance costs, contracting strategies that help and those that hurt, the pros and cons of value engineering, relevant key performance indicators, effective communication and incorporating input from the ultimate users—all with a focus on better return on investment.

Moderator: Brian Stamper, Advantic LLC

Speakers: Tony Bazzini, ExxonMobil Global Projects Co.; Pete Dumont, Sizemore and Company LLC; Scott Straight, LG&E and KU Energy LLC

Health Care Breakout

Project Conceptualization—The Builder's Role *Las Colinas*

Health care providers know what services they need to provide and to whom, but they do not always have a clear idea of the limitations that may be presented by the structures in which those services are to be provided. Explore how can health care providers can best equip designers and contractors to maximize the utility of the structures designed and built to deliver health care services.

Moderator: Jack Darnall, Brasfield & Gorrie

Speakers: Andi King, DPR; Mark Mattox, Robins & Morton; Mike Purcell, Skanska; Gary Roden, TDIndustries; Chris Wall, Brasfield & Gorrie

Speakers

Tony Bazzini joined Exxon Research and Engineering's Cost and Schedule Engineering Division as a cost engineer in 1981 after receiving a B.E. in mechanical engineering

from the Stevens Institute of Technology. In 2013, he was named manager of the Project Management Division, expanding his responsibilities to include both refining and chemicals projects. Having worn many hats throughout his 38-year career with Exxon, he was appointed chief engineer—project management of the newly established ExxonMobil Global Projects Company in April 2019.

As workforce development director at NCCER, **Dan Belcher** informs and updates government, workforce, industry and education sponsors about NCCER and its

activities. He helps companies, schools and governmental agencies implement workforce development activities and foster the growth of the craft professional. He is the liaison between NCCER and organizations including ACTE, SkillsUSA, ACCE, NTHS, Advance CTE, MCAA, AGC and ABC and serves on the boards of the National Technical Honor Society and the American Council of Construction Education.

Ty Campbell is the director of sales for digital solutions at United Rentals. He and his team help firms leverage digital solutions to manage fleet and job cost related to

equipment on jobsites where providing equipment data and the tools to use it is almost as important as the equipment itself. Prior to joining the equipment industry, Campbell was an airport planner and project manager with responsibilities in designing, planning and funding general aviation airport projects.

Mike Casten, started his career as a carpenter's apprentice before studying industrial construction management at Colorado State University. Later, based

on his experience as a project engineer, superintendent, production analyst, chief estimator, project manager and area manager for general contractors such as Hensel Phelps Construction, he founded Construction Concepts. Over the last forty years he has provided productivity improvement consulting services on projects of every size and type across the United States and in Canada, Mexico and Venezuela.

David Chapin is the president and CEO of Willmar Electric, which has offices in Minnesota, Nebraska and Oklahoma. He and his brother, Justin, represent the fourth

generation of Chapins to own and manage the firm his great-grandfather started in 1920. Chapin was ABC's 2016 national chair and currently serves as chair of the ABC Cornhusker Chapter. He serves on ABC's National Legislative Committee and on the board of trustees for the NCCER.

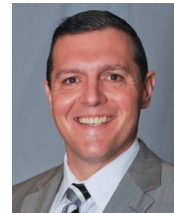

Jack Darnall is executive vice president of Brasfield & Gorrie. His 34 years of construction experience includes regional and divisional leadership roles and overseeing

Brasfield & Gorrie's healthcare division for 16 years. Under his guidance, the company has been ranked among the nation's top healthcare contractors for the past 20 years. He served on the ABC national executive committee for seven years and as national chairman in 2006. He was previously ABC Alabama chapter chair.

Serving as in-house counsel since 2001 for LG&E and KU Energy LLC, **Jim Dimas** advises the commercial operations and project engineering departments on the preparation,

negotiation and administration of contracts for work at company-owned and -operated electric generation sites. He partners with commercial, engineering and operations colleagues to develop and manage relationships with contractors under EPC and PC agreements. He previously worked in real estate, occupational safety and health, mergers and acquisitions, and finance law.

Peter Dumont, past president of the Construction Users Roundtable, currently serves as executive liaison to CURT's Operating System 2.0 (OS2) Initiative and is

a consultant with the Premier Resources Group of Sizemore & Co. He has 25 years of engineering and construction experience developing and executing capital projects globally. Dumont has worked in all phases of capital projects, from early front-end planning through detailed engineering, procurement, construction and commissioning/start-up on various sized industrial projects ranging up to \$30B.

Dan Freese is president of United Group Services. Founded in 1982 as an industrial piping company, United is now a series of industrial-focused companies

providing construction, staffing and technical training services across the United States. He started with United in 1987 and was named president in 2002 as United began broadening its services. Being "born" in to the industry as the son of a second-generation pipefitter, he is focused on improving this rewarding industry.

Speakers

Daniel Groves is the director and workforce consultant for the Construction Users Roundtable, focusing on metrics, benchmarking and deployment of best practices to help owners achieve the most productive use of every capital dollar. He is also the CEO of Construction Industry Resources, a market intelligence and project risk mitigation company that produces the Construction Labor Market Analyzer®. He was named a global Top 25 Newsmaker by ENR Magazine for his work developing the CLMA.

Michael Hatton, vice president at Memorial Hermann in Houston, manages facilities at a corporate level. With extensive experience in high-rise building management, medical office buildings and hospitals, he has been a key team member in the successful delivery of more than \$1.5 billion of health care construction with \$1 billion more in the pipeline. He holds ASHE's FASHE and CHFM designations and has authored technical papers and presentations on emergency management, energy and engineering operations.

Brian Holmes is a 26-year veteran of Texas Health Resources. He is senior vice president of real estate development and deployment, overseeing facilities development and capital project management for all hospitals owned by THR and through its partnerships. He also leads system facility engineering and real estate operations for THR's portfolio of medical office buildings. Prior to joining THR, Holmes served as an officer in the Navy Civil Engineer Corps.

Andi King-Wieczynski, client relations manager for DPR Construction in Atlanta, has been an integral part in growing the business from \$25M in revenue in 2008 to \$256M in 2018, working with prominent clients such as the University of Georgia, Piedmont Hospital

and the State of Georgia to accomplish this feat. As the first woman to sit on DPR's Atlanta Business Unit Leadership Team, Andi builds a strong footing for other women within the organization.

Ed Luckenbach is the manager for Air Products and Chemicals' Americas Field Execution Team, overseeing construction estimating, construction and commissioning. Luckenbach has 28+ years with Air Products in the areas of industrial gas plant engineering, design and construction. His career includes mechanical engineering of systems, large machinery engineering and commissioning and more than 15 years starting up air separation and HyCO plants. His passion is site safety, leadership and making the contractor workforce successful.

Mark Mattox is an operations manager at Robins & Morton, where he oversees health care, education and commercial work for the company's central division. Since graduating from Auburn University's McWhorter School of Building Science, Mattox has been involved in more than 100 projects in his 23 years in the construction industry. His unique perspective stems from a comprehensive understanding of construction at every level and a variety of operational experience encompassing both field supervision and project management.

Greg Mohler serves as vice president of construction, real estate services and facilities at BJC HealthCare, where he is responsible for engineering design solutions, infrastructure, capital budgeting and health care construction across the organization. Previously, he was director of plant operations for Christian Hospital; director of construction for Christian Health Services; project director, director of construction and vice president for BJC. He focuses on diversity and inclusion and, serves on numerous related boards and councils.

Scott Nelson has spent 32 years working in the planning, design and construction of healthcare facilities. Having been on both sides of the architect-client table, he has served as the principal for national and international architectural firms and as a guide for the planning and design of projects for name-recognized hospitals and systems. Currently, he is the system vice president of design and construction and responsible for managing forward-focused projects for 28 hospitals and 500 additional care sites at Advocate Aurora Health.

Joe M. Powell is the executive director of the Institute for Healthcare Infrastructure Research, a program of the University Research Institute in Washington, D.C. A registered architect with a master's degree in architecture, he has spent his 40-year career researching the relationship between corporate strategy, human behavior and the built environment. He is the author of *The New Competitiveness in Design & Construction*.

Captain Nate Price is the Chief of the Facilities Enterprise, for the Defense Health Agency. He has served for over 20 years in the Navy's Civil Engineer Corps, focused on leading strong teams and building and managing utilities, infrastructure and the environment. His recent career highlights includes, serving as the director of operations for the Naval Facilities Engineering Command's Engineering and Expeditionary Warfare Center, orchestrating the delivery of unique solutions around the globe.

J. David Pugh is a partner in the Birmingham, Alabama, office of Bradley Arant Boult Cummings LLP, where he is part of the firm's construction law practice group. He advises contractors, subcontractors, owners and developers on the development, design and construction process. Pugh holds a bachelor's degree

Speakers

in civil engineering from the University of Alabama and worked as a project engineer before earning his law degree from Vanderbilt University Law School.

Mike Purcell is vice president of operations for Skanska USA, a top modern health care builder and comprehensive health care program management firm headquartered in Dallas. Previously, he served as executive vice president and as chief operating officer of two offices of Skanska USA. With a degree in building sciences from Auburn University, Purcell's experience covers the entire development life cycle of the project as both the construction manager and owner's representative.

Gary Roden has been a central figure in the Dallas-Fort Worth construction community for 35 years. With a background in both design and construction, he has the ability to envision creative solutions on projects from conception to completion. Formerly the president of full-service architecture, MEP design, program management and construction firm Aguirre Roden, he now leads TDIndustries' design-build business relationship initiatives.

A 29-year veteran of the construction industry, **Kevin Sell** is the Chief Values Officer of United Group Services, a Cincinnati-based mechanical industrial construction firm that operates throughout the United States. Sell was a contributing author to George Burk's Value Centered Leadership and he co-authored the Voluntary Protection Program for Construction for the U.S. Department of Labor-OSHA. He currently serves as Chair of the ABC Business Development Committee and as a member of the CURT Workforce Development Committee.

Greg Sizemore is the vice president of health, safety, environment and workforce development at Associated Builders and Contractors, a national construction

industry trade association established in 1950 that represents more than 21,000 members. In this role, he oversees a network of 800 education programs and leads ABC's health, safety, environment and workforce development initiatives. Sizemore is also responsible for ABC's STEP safety management system, a benchmarking improvement tool that dramatically increases safety performance among participants.

Brian Stamper is a managing partner at Advantic LLC, an international turnkey structural composite company, where he manages and develops client relationships along with leading the preconstruction team as well. Previously he led business development at United Group Services and worked with owners during stints at the Construction Users Roundtable and Construction Labor Market Analyzer. He started his construction career with Danis Construction and has construction project management experience in the industrial and commercial sectors.

Laura Stipanowich joined Bechtel Oil, Gas and Chemicals Inc. as a senior counsel in Houston in January 2017. She previously practiced with law firms in Washington, D.C., and Atlanta, where she specialized in the areas of construction transactions, alternative dispute resolution and litigation. Laura has written articles, contributed to legal reference books and presented seminars throughout the United States. She attended the University of Virginia School of Law.

With 34 years of experience in the electric and natural gas utility industry, **Scott Straight**, vice president of project engineering, manages the development, engineering, procurement, construction and commissioning execution for all major capital projects at LG&E and KU Energy's generation companies. Straight joined the company in 1984 as a mechanical engineer and has been part of nearly every major generation

construction project the company has undertaken since—more than \$8 billion in projects in the last 12 years.

Dr. Kenneth Sullivan is an associate professor at the School of Sustainable Engineering and the Built Environment at Arizona State University, teaching

advances in construction delivery and innovation. He specializes in construction delivery approaches, best value procurement, performance and risk measurement and organizational transformation. He has helped Fortune 500 companies and public organizations transform their construction services, including the City of Los Angeles Department of Water and Power, Salt River Project and Seattle City Light.

A 20-year veteran of the commercial health care industry, **Chris Wall** is the Dallas operations manager for healthcare at Brasfield & Gorrie, one of the nation's largest privately held

construction firms. His professional affiliations and industry involvement include Associated Builders and Contractors, the Texas Association of Healthcare Facilities Management, the Association of Medical Facility Professionals and the U.S. Green Building Council. Wall earned a bachelor of science degree in building science from Auburn University.

Lowell T. Woods Jr. is a partner with the law firm of Taft Stettinius & Hollister, LLP, with offices in Ohio, Indiana, Illinois, Kentucky, Michigan and Arizona. He

focuses his practice on alternative dispute resolution and litigation in the construction industry, both public and private, as well as labor and employment, first party insurance disputes and general commercial litigation. He drafts contracts and provides guidance and training to client representatives on wide scope of construction-related matters.

**FIND AND DO BUSINESS
WITH OTHER ABC MEMBERS.**

FindContractors.com

FindContractors.com is an excellent tool to help members find and do business with other members. Members can search for an ABC contractor, supplier or other construction professional by name, chapter, location, sales volume or type of construction. Plus, it's easy to find members that have earned an Excellence in Construction® award, participate in the STEP safety management system and Accredited Quality Contractor program, have federal designations and have signed the Drug- and Alcohol-Free Workplace Pledge. You can also update your membership information.

Do More With ABC

Founded on the merit shop philosophy, Associated Builders and Contractors helps its more than 21,000 members develop people, win work and deliver work safely, ethically and profitably for the betterment of the communities in which ABC and its members work. From best-in-class safety programs to educational events, accreditation and award programs, ABC has the solutions for merit shop companies nationwide. abc.org

Here's a sampling of ABC's programs and services:

Accredited Quality Contractor

Associated Builders
and Contractors, Inc.

The AQC designation provides national recognition to construction firms that annually document their commitment to quality achievement in five areas of corporate responsibility: quality construction, safety, community relations, talent management and employee education. abc.org/aqc

Construction Executive

Construction Executive, ABC's award-winning magazine, is the leading source for news, market developments and business issues impacting the construction industry. Designed to help readers run more profitable and productive businesses, each issue reaches more than 53,000 contractors and construction-related business owners. constructionexec.com

Construction Management Competition

Construction
Management
Competition

The ABC Construction Management Competition is a hallmark competition that promotes careers in construction management.

The competition is designed to challenge construction knowledge, organization, time management, and presentation skills, giving the nation's top construction management students a glimpse into the real world of construction and an opportunity to showcase their talents. abc.org/cmc

Craft Instructor of the Year

Each year, ABC presents the Craft Instructor of the Year award to an instructor who possesses outstanding creativity, a positive attitude, and the ability to transfer knowledge through good communications skills and innovative teaching to promote lifelong learning to the future workforce. The recipient of this national award best embodies the merit shop ideals through superior effort and talent. abc.org/workforceawards

Craft Professional of the Year

ABC presents the annual Craft Professional of the Year award to an individual who sets a high standard for professionals in their craft by exhibiting outstanding skills and leadership. The recipient of this

national award demonstrates a passion for the trade, takes pride in hands-on work, and appreciates the satisfaction of a job well done to benefit both the construction industry and the greater community. abc.org/workforceawards

Diversity & Inclusion Summit

DIVERSITY & INCLUSION SUMMIT

ABC's fifth annual Diversity & Inclusion Summit will harness innovation by demonstrating diversity as a key driver of success. Join industry leaders and stakeholders for thought-provoking discussions and solutions-based recommendations that help ABC members build diverse workplaces and supplier networks, all while reimagining the intersection of diversity and innovation. diversity.abc.org

Excellence in Construction® Awards

ABC's National Excellence in Construction Awards program recognizes the industry's most innovative and high-quality construction projects across the nation, as well as firms that have demonstrated world-class safety and diversity excellence. The Contractor of the Year is also revealed and celebrated. Winning contractor firms are joined at an annual black-tie awards

Do More With ABC

gala by their project team—owners, architects and engineers—to celebrate these prestigious achievements.

abc.org/eic

National Craft Championships

ABC's annual National Craft

Championships celebrates lifelong learning in the merit shop construction industry. Craft trainees from chapter and member training programs across

the country compete for national recognition in 13 crafts in an intense two-day event during ABC Convention. nationalcraftchampionships.org

National Student Chapter Network

The ABC National Student Chapter

Network connects local ABC chapters to colleges and universities with construction management programs with the ultimate goal of building the construction management pipeline and mentoring future leaders of the construction industry. ABC chapters facilitate the interaction of ABC member firms with student chapters through a variety of industry association and school events, including regular membership meetings, guest speakers, internships, community service projects, and other activities.

abc.org/studentchapter

Peer Groups

ABC's peer groups give like-minded business owners an environment conducive to sharing ideas and discussing opportunities and challenges—all with the goal of improving their businesses. Peer groups consist of six to 10 ABC member companies within a trade or interest area and with similar annual revenues. Members in the same peer group do not operate in the same competitive market, which fosters trust and an open exchange of information.

abc.org/peergroups

ABC Project Management Institute at Purdue University

The ABC Project Management Institute was designed by and for today's contractors as an intensive management education program held at Purdue University in West Lafayette, Indiana. The 80-hour program uses real examples and case studies to teach owners, managers and estimators to develop and utilize tools that will improve profitability and productivity and increase customer satisfaction.

abc.org/pmi

STEP

Established in 1989, ABC's STEP program was developed and written by contractors, for contractors, to establish safety as a core value. STEP offers an organized approach for analyzing and developing company-wide safety and loss prevention programs that can reduce recordable incidents by up to 85 percent. abc.org/step

ABC Users Summit

The exclusive ABC Users Summit brings contractors and owners together for

general sessions, networking functions and segment-specific breakout sessions where issues unique to the health care and industrial industries are addressed. userssummit.abc.org

Young Professionals

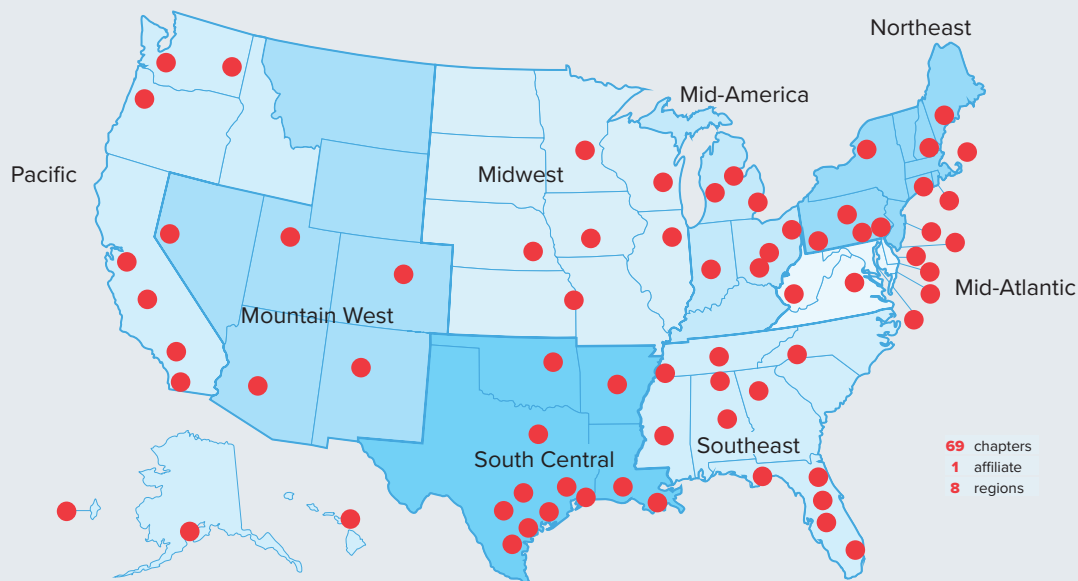

ABC's national Young Professionals program gives young leaders the opportunity to network and build relationships with peers, industry experts and association leaders across the country, and to learn from different perspectives. Participants gain access to resources on industry trends and insight into the future of construction.
